PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate at Jashore University of Science and Technology with strong expertise in robotics, intelligent systems, machine learning, and software development. Experienced in C++, Python, algorithm design, and data-driven modeling. Former President of JUST Robo Society, having organized national robotics competitions and technical workshops. Proven research background in spatio-temporal traffic accident forecasting and predictive analytics. Passionate about engineering practical, autonomous, and technically grounded software solutions.

CORE TECHNICAL STRENGTHS

Programming	C, C++, Java, Python, JavaScript
Algorithms	Data Structures & Algorithms, Competitive Programming, OOP
Robotics & ML	Line-Following Robots, Autonomous Systems, Spatio-Temporal Modeling, Deep Learning
ML Frameworks	NumPy, pandas, TensorFlow, XGBoost, LightGBM, CatBoost, ARIMA/SARIMA
Software & Web	React, Next.js, HTML/CSS, Django, Flutter, MySQL
Tools & Platforms	Git, GitHub, VS Code, Jupyter Notebook
Soft Skills	Leadership, Strategic Planning, Team Coordination, Analytical Problem-Solving

ROBOTICS & TECHNICAL EXPERIENCE

JUST Robo Society, Jashore University of Science and Technology
President

August 2024– March 2026

- Led robotics-focused student activities, technical events, competitions, and collaborative initiatives.
- Supported organization of a Line-Following Robot (LFR) competition as part of university-level technical activities.
- Contributed to hosting the regional round of the International Robo Olympiad at JUST in collaboration with Robo Tech Valley.
- Coordinated student teams, volunteers, event logistics, and technical activities during robotics programs.
- Promoted hands-on robotics learning and participation among university students.

RESEARCH EXPERIENCE

Spatio-Temporal Traffic Accident Risk Modeling in Bangladesh

Undergraduate Research / Thesis

- Developed machine learning and time-series forecasting approaches for division-wise road accident indicators in Bangladesh.
- Worked with XGBoost, LightGBM, CatBoost, ARIMA, and SARIMA for predictive modeling and comparative analysis.
- Applied feature engineering, temporal analysis, residual analysis, and risk mapping to support data-driven decision making.
- Explored interpretable machine learning approaches for practical intelligent systems.

SELECTED TECHNICAL PROJECTS

Student Management System

Desktop Application

- Designed and developed a desktop application for academic records, attendance, and student performance management.
- Implemented structured data handling and user-oriented workflows for academic administration.

Online E-commerce Website

Web Application

- Developed a web-based platform for product browsing, purchases, and order management.
- Focused on usability, structured data management, and application workflow design.

E-commerce App

Android Application

- Developed a mobile application for managing online products, purchases, and orders.
- Implemented user-oriented interfaces and application workflows for mobile usage.

Bangla Road Accident News Dataset

NLP / Data Processing

- Worked on collecting and structuring Bangla road accident news data for downstream analysis.
- Applied text processing, information extraction, and structured data preparation techniques.

PROFESSIONAL EXPERIENCE

Air Top Overseas

Reservation and IT Support Intern

6 Months

- Provided day-to-day IT and user support for organizational operations.
- Assisted with technical troubleshooting, computer systems, software, and digital workflows.
- Supported reservation-related operational activities and documentation.
- Worked collaboratively with team members to resolve technical and operational issues.

EDUCATION

Jashore University of Science and Technology (JUST)

Bachelor of Science in Computer Science and Engineering

2022–2026

CGPA: 3.28 / 4.00

Quality Education College

Higher Secondary Certificate (HSC)

2018–2020

GPA: 4.75 / 5.00

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Participated in ICPC programming contests multiple times.
- Regular competitive programmer and problem solver on Codeforces and CodeChef.
- Participated multiple times in national robotics-related activities.
- Participated in 50+ seminars and technical or academic events.
- Participated in university technical workshops, coding bootcamps, and research activities.

LEADERSHIP & ORGANIZATIONS

JUST Robo Society

President

Narsingdi Student Association, JUST

President

JUST Research Society

Office & Operations

UNNOTO MOMO SHIR

Founding Member

JUST CSE Club

General Member

JUST Blood Bank

Member / Volunteer

Contributed to science festivals, flood relief initiatives, student support, awareness programs, blood donation activities, community engagement, and university technical events.

TRAINING & CERTIFICATIONS

- **Advanced Machine Learning with Python** – EDGE Project, CSE Department, JUST
- **Web Development Bootcamp**
- Additional online professional courses and technical workshops

ADDITIONAL INFORMATION

Career Focus	Robotics Software, Intelligent Systems, Machine Learning, Autonomous Systems
Languages	Bengali, English
Driving	Light and Heavy Vehicle Driving Skills / Training
Interests	Robotics, Intelligent Systems, Competitive Programming, Machine Learning
